

Iran Mall Field Trip (October 2018)

It was always interesting to go on field trip from school because, many students learn more about their course of study and their society. It was the same here. I have enjoyed the journey as well as the rest of the people who joined us in the field trip. The trip was quite successful and a lot useful for our CAS, Visual art and Business projects.

We arrived there at 9am. At first we went to the conference room In Mashaalie's tower. The name was put because of the architect who made the tower and dead two years ago in the middle of finishing his project. A man whose name was Dr Asna ashary introduced a little bit the mall and showed us a very exciting clip about what processes has been done to build Iran Mall and what kind of facilities does the Mall has.

I got shucked when he said that Iran Mall is the second biggest Mall in the world with various services. They told us that twenty thousands of people work there per day, so we can see that whit in all of the facilities and entertainment that hey provide, they have given work to many people who need money.

The second place we went was, 'Didar's Garden'. We had delicious cold drinks in that garden. After a while we went to 'Iranian Sough ' there was a big round stone in the middle of the area. They told us that it was a tradition to put that kind of round stone in the middle of the way to 4 boutiques in past centuries. We went to an Antique gallery; we saw numerous expensive things from hundred years ago. One of the things that made me satisfied and pleased with them was that they had a big handmade carpet in their Gallery which was taken to France by Pahlavi's queen (Farah) and they bought and bring it back to it's first place.

The third place was called, "cinema Café". The interesting part was that it has two parts one for actors and actresses in modern cinema and the other for, actor and actresses who worked in Defae Moghadas Cinema. They told us that whenever a famous actor or actress came they would put the films that they have taken place on the walls to show that we do care, how much they try to entertain us. I got tired because we had walked a lot, but when in the time that we went to "Sharbat Khane" and we had cold drinks with tiny sweets I got refreshed and wanted to see more places. This place was one of the best places that can show an Iranian person culture and Architecture in past centuries.

After refreshing we went to "Books Garden". There was a very huge and gigantic place to store books and enjoy reading different books from different places. It was made of wood and it gave me a warm feeling of joy.

Now it comes to the most interesting place that we all enjoyed it more than other places. This place was enormously beautiful. Its name was " Mellal's Restaurants". The place was as romantic as Romeo and Juliet's story was. You could see Italian and French Architecture there. The leader told us that this small town has forty restaurants from different countries for people to experience new food and for those who want to have their own country foods in different countries.

At the end of the trip, we went to "Mahan's Garden" that the idea was from Kerman's Mahan Garden. The leader told us that in a very famous architectural complex in Canada, they have pictures from this beautiful garden. We had a very yummy and delightful lunch there. I appreciate them for the nice schedule that they had planned for us and I told them that it was a pride for me to tell people from different countries that we have such a Mall with these kinds of facilities.

I hope, we can make a better future for our country and make it one of the best and one of the most developed countries in the world.

Iran Mall

Iran Mall is the 2nd largest mall in the whole world and established by IMCC. It is still under construction in the suburbs of Tehran. Iran Mall is mostly regarded for its astonishing beauty and mesmerizing sceneries.

Iran Mall covers over one million square meters and is bound to grow more. This astounding project has taken and combined different bewildering cultures and arts from different parts of Iran combining all of these stunning works to make it the masterpiece it is today.

This perplexing complex has many different sections and parts mostly built on a 'G' level, though they differ in heights. It has diverse entertainment sections like a tennis stadium or a water display park equipped with the most modern technology of water dance and light shows.

The customer service and people who run the place are absolutely welcoming and hospital. During my visit to the mall other than the flawless greeting we got I got to admire the place itself too. The whole mall was unquestionably exquisite, yet my most adored sections were the spell bounding waterfall and the magnificent and glorious library.

Iran Mall itself is a center of culture, art, history and pure perfection. As an Iranian person who lives here, I get filled with pride when I think of what an amazing treasure we have in our own country. No words could describe the beauty I have seen.
